

I-93 TRI-TOWN INTERCHANGE

ANDOVER TEWKSBURY WILMINGTON

**MassHighway and the MA Executive Office of Housing
and Economic Development**

Invite you to a

Public Workshop

for the

I-93 Tri-Town Interchange Project

Thursday, June 25, 2009, 4:00 – 8:00 PM

**Wilmington Town Hall, Auditorium
121 Glen Road, Wilmington, MA**

MassHighway and the Executive Office of Housing and Economic Development are joint proponents for the I-93 Tri-Town Interchange Project. The project will add a new interchange between Interchanges 41 and 42 and also add a lane in each direction between Interchange 41 and Interstate 495. The project will reduce congestion, improve safety, support the communities' goals for sustainable development and mixed-use projects, minimize environmental impacts and support the vision of a proposed life sciences and high technology corridor.

The purpose of this workshop is to present updated information and gather public input. There will not be a formal presentation, so the public is encouraged to attend at any time that is convenient during the 4 PM to 8 PM timeframe. Workshop stations will include information on traffic analyses, interchange alternatives and wildlife, wetlands and open space resources. Participants can view information and speak individually with project staff. Members of the public, business owners, elected and municipal officials are encouraged to participate and provide comments on issues of concern and suggestions for meeting the project purpose while minimizing impacts.

If you have questions or would like to be added to our email distribution list, please contact John Fallon at MassHighway, 617-973-7408. For more information about the project, please visit the website at www.mass.gov/i93tritowninterchange.
