Can direct democracy in Andover be inclusive, informative, and flexible on ways to participate?

Hello,

I have posted my personal experience with Open Town Meeting, principals for effective governance I'd like the Town of Andover to prioritize, an analysis of resident feedback, prioritized what I thought were the most pertinent problems to address based on my and other town resident's feedback, some solution recommendations, ways to measure success, and included some outstanding questions that would be helpful to answer as well as concepts for online engagement with the community all here:

Thanks for considering my feedback.

Cheers,
