DEPARTMENT OF PUBLIC WORKS

5 CAMPANELLI DRIVE 01810

To: Andover Planning Board
From: Art Martineau, Town Engineer & Jeff Crane, Water/Sewer Superintendent
Subject: 7 Tantallon Rd
Date: November 8, 2022

1. DPW is particularly concerned with the applicant adhering to condition 18 of the Special Permit Decision SP17-06. Condition 18 states in part that the water service to the Shawsheen Pump Station (SPS) be maintained throughout construction. DPW expects that the water feed to the SPS which originates in Haverhill St and follows along Tantallon Rd will remain active. This may, or may not, require a temporary bypass of the water main.
2. All water main work scheduled for the 2023 construction season is likely to be affected by nearby Town originated water main construction. DPW expects the applicant's contractor to coordinate with the Town contractor to facilitate construction that does not interfere with the Town project.
